

## PRESS RELEASE

Ceyzériat, May 15, 2023

**With the acquisition of the Blowing activity of the ANVI group located in Villereversure (01250), the Hyléance family is growing!**

Hyléance is a French industrial family group located in Ain and Jura. It consists in plastics processing companies specializing in injection molding and extrusion blow molding.

Today the group generates a turnover of 48 million euros in the packaging (food, health, hygiene, cosmetics, chemicals), industrial technical parts, energy, mobility, building and outdoor facilities markets.

The acquisition of the blowing activity of ANVI plasturgie, by its subsidiary **ESIS (Extrusion Soufflage Industriel du Suran)**, allows Hyléance to consolidate its expertise and its offer on the building, outdoor facilities and health markets. In addition, the strengthening of its extrusion blow molding division thanks to the integration of 8 machines from the Villereversure site allows Hyléance to become a major player in this technology with 26 extrusion blow molding machines.

Thanks to this growth, Hyléance will reach a turnover of 52 million euros in 2023, generated by 225 employees. Hyléance is thus pursuing its development strategy based on industrial versatility, the agility of a group of SMEs, ecological and environmental innovation and also the loyalty of its employees.

(Villereversure site – 01250)

- **52 million euros of turnover**
- **225 employees**
- **80 injection presses**
- **26 blowing machines**
- **5 production sites in France:**
  - Ceyzériat – 01
  - Nivigne et Suran – 01
  - Lavans les St Claude – 39
  - Veyziat – 01
  - Villereversure – 01

Hyléance is able to design small, medium and large series parts. The group was built around 3 major challenges: reaching a critical size, pursuing family business projects driven by strong values and investing in modern and innovative means of production to become a 4.0 group, driven by innovation and excellence.

Hyléance integrates an eco-responsible approach into all its development projects, which enables it to support its customers in reducing their environmental impact.

The ESIS company (registered in the Trade Companies Register of Bourg-en-Bresse under the number SIREN n° 952 262 061), newly created for the takeover of the ANVI Blowing activity, is 100% owned by Hyléance.
